## INTRODUCTION

At present the Department of Agriculture is constituted on the basis of six subdivisions, Administration Service, Science Service, Experimental Farms Service, Production Service, Marketing Service and Special Act Administrations. This arrangement, which was brought about in 1937, carries out the principle of bringing under one administrative head activities similar in character and purpose in the broad fields of work with respect to experimental and scientific investigations in connection with production and marketing of agricultural products; as well as rehabilitation and assistance programs.

## ADMINISTRATION SERVICE

HEADQUARTERS—CONFEDERATION BUILDING, OTTAWA

DEPUTY MINISTER—DR. J. G. TAGGART

The general administration of the Department is under the direction of the Deputy Minister. Responsible to him for the operation of their own staffs are the Directors of Science Service, Experimental Farms Service, Production Service, and Marketing Service. In carrying out the daily administrative tasks the Deputy Minister has his own personal staff and the assistance of two organizations which service the whole Department as follows:

Deputy Minister.....	Dr. J. G. Taggart
Assistant Deputy Minister.....	Dr. J. G. Bouchard
General Executive Assistant.....	A. L. Stevenson

## ADMINISTRATIVE SERVICES

These Services comprise five units: Departmental Secretary; Organization and Personnel; Office Services; Stationery and Supplies; and Supervision of Race Track Betting. The Departmental Secretary deals with correspondence from the Department and the public. The Organization and Personnel unit handles all matters respecting assignment, promotion, reclassification, and release of employees. Studies are also made by this unit in co-operation with heads of Services regarding procedures and organization methods in dealing with personnel matters. The Office Services unit supplies centralized services to the Department such as the assembling and submission of the Estimates, automobile and journal subscription cost records, travel warrants, reservations, and accounting for Administration Service. The purchasing of stationery, furniture, and general supplies of certain kinds for the whole Department is centralized in the Stationery and Supplies unit. The Supervisor of Race Track Betting supervises the pari-mutuel betting on race tracks generally and frames regulations to ensure that the provisions of the criminal code regarding horse racing have been met.

Director.....	H. L. Trueman
Chief, Organization and Personnel.....	R. J. Groves
Assistant Chief.....	B. M. Sands
Departmental Secretary.....	D. M. Allan
Chief, Office Services.....	W. D. Goold
Assistant Chief.....	J. B. Archambault
Chief, Stationery and Supplies.....	D. L. Burgess
Assistant Chief.....	J. W. Martin
Chief Supervisor, Race Track Betting.....	J. D. Higginson

## INFORMATION SERVICE

Information Service operates in two divisions. The Press, Radio, Film, and Exhibits unit prepares information for distribution through the farm press, the daily and weekly press, and radio stations; supervises the making of motion pictures and film strips; and prepares educational displays for regional and national fairs and exhibitions. The Publications and Library unit edits and distributes bulletins, reports and leaflets; and maintains a comprehensive agricultural library for the use of departmental staff and others.

Director.....	S. R. N. Hodgins
Chief Information Officer.....	R. S. Mackay
Information Officer (Radio, Films).....	P. Gormley
Information Officer (English Press).....	J. R. Peet
Information Officer (French Press).....	L. Arsenault
Supervisor, Exhibits.....	H. S. Tewsley
Photographer.....	F. Tyrell
Chief Editor.....	J. S. McGiffin
Departmental Librarian.....	Mrs. M. N. Reynolds
Editor.....	C. H. Kenney
Editor.....	Miss V. M. Ross
Editor.....	Dr. A. J. W. Dyck
Artist.....	G. M. Trottier
Supervisor, Processing and Distribution.....	N. H. Thompson

## SCIENCE SERVICE

HEADQUARTERS: SCIENCE SERVICE BUILDING, OTTAWA

DIRECTOR—DR. K. W. NEATBY

Science Service includes the Divisions of Administration, Animal Pathology, Bacteriology and Dairy Research, Botany and Plant Pathology, Chemistry, Entomology, Forest Biology, and Plant Protection.

The work of the Service is directed toward the solution of practical problems of agriculture, through the application of the results of scientific investigations. It deals with problems relating to insect pests and diseases affecting plants and animals, the deterioration of plant and animal products through invasion of micro-organisms, the nutritional requirements of animals and plants, and the chemistry and microbiology of soils and dairy products. The work is carried on at the Ottawa headquarters laboratories and at national, regional and field laboratories distributed throughout the country. Activities of Science Service are co-ordinated with those of other services of the department as well as with the research work undertaken by the National Research Council and by universities and agricultural colleges.

### ADMINISTRATION DIVISION

The Administration Division looks after the business management of the Service. It assumes responsibility for the design and construction of buildings and for the local administration of large laboratories that house staffs of more than one division. In addition, it includes an art and photography unit and a statistical research laboratory.

### SCIENCE SERVICE ADMINISTRATION AND LABORATORIES IN OTTAWA AND HULL

*Science Service Building, Carling Avenue, Ottawa, Ontario\**

Director.....	Dr. K. W. Neatby
Associate Director.....	Dr. W. E. van Steenburgh

## Administration

### *Central Office*

Assistant to Director.....	W. B. Brittain
Accountant.....	D. P. Nigra
Art and Photography.....	L. B. Jameson
Personnel Officer.....	H. W. LeRoy

### *Statistical Research and Service*

Senior Biometrician.....	G. B. Oakland
--------------------------	---------------

*Regional Research Adviser (Prairie Provinces), Laboratory of Plant Pathology, University of Manitoba, Winnipeg, Manitoba.....Dr. W. F. Hanna*

### *National Laboratory*

*Science Service Laboratory, University Sub Post Office, London, Ontario.*

Director.....	Dr. H. Martin
Administrative Officer.....	J. A. Boyle
**	

### *Regional Laboratories*

*Science Service Laboratories, Box 270, Lethbridge, Alberta.*

Director.....	Dr. W. C. Broadfoot
Administrative Officer.....	F. G. Wagner
***	

\*Address for all offices unless otherwise indicated.

\*\*Research staff listed under London, Ontario.

\*\*\*Research staff listed under Lethbridge, Alberta.

## ANIMAL PATHOLOGY DIVISION

This division conducts research and experimental studies relating to animal diseases, engages in the manufacture of biological products (prophylactic and diagnostic) and related investigations, performs laboratory diagnosis relative to infectious and non-infectious disease; also general laboratory services.

*(Animal Diseases Research Institute, Hull, Quebec.)*

Chief of Division.....	Dr. C. A. Mitchell
Administrative Officer.....	J. C. Moffatt
Principal Animal Pathologist (Swine and Poultry Diseases).....	Dr. R. Gwatkin
Principal Research Officer (Serology Research).....	Dr. Christine E. Rice
Senior Animal Pathologist (Histopathology).....	Dr. P. J. G. Plummer
Senior Animal Pathologist (Virus diseases).....	Dr. R. V. L. Walker
Senior Animal Pathologist (Biological Products).....	Dr. H. Konst
Research Officer.....(Bacteriology).....	J. L. Byrne
Biochemist.....	Dr. E. Annau
Associate Animal Pathologist (Brucellosis Research).....	Dr. T. Moore
Associate Animal Pathologist (Serology—Routine).....	Dr. C. Mackie
Associate Animal Pathologist (Serology—Research).....	Dr. P. Boulanger
Associate Animal Pathologist.....	Dr. G. R. Carter
Assistant Animal Pathologist.....	Dr. J. W. Pullin
Associate Animal Pathologist.....	Dr. R. J. Avery
Associate Animal Pathologist.....	Dr. A. S. Greig
Associate Animal Pathologist.....	Dr. P. D. McKercher
Technical Officer.....	Miss E. F. Whitney
Technical Officer.....	Miss E. L. Dzenis

## BACTERIOLOGY AND DAIRY RESEARCH DIVISION

This division conducts research in the fields of dairying, food and soil microbiology, and general agricultural bacteriology. Major attention is given to the improvement of quality in milk, butter and cheese, to problems of food preservation, and to fundamental studies on soil micro-organisms in connection with soil fertility and soil-borne plant diseases.

Direct services include the bacteriological analysis of samples submitted by other divisions and the preparation of seed inoculants for departmental

projects. Control work involves the determination of quality of products within the scope of Acts and Regulations administered by the Department.

Chief of Division.....	Dr. A. G. Lochhead
Senior Bacteriologist.....(Foods, Dairying).....	Dr. C. K. Johns
Senior Bacteriologist.....(General Bacteriology).....	Dr. H. Katzenelson
Head, Dairy Research.....	Dr. E. G. Hood
Senior Bacteriologist.....(Soils).....	Dr. M. I. Timonin
Bacteriologist.....(Dairy Technology).....	A. H. White
Bacteriologist.....(Foods).....	Dr. A. H. Jones
Associate Bacteriologist.....(Antibiotics).....	G. B. Landerkin
Associate Bacteriologist.....(General Bacteriology).....	Dr. C. E. Chaplin
Associate Bacteriologist.....(Physiology).....	Dr. J. Robinson
Assistant Bacteriologist.....(Soils).....	R. H. Thexton
Assistant Bacteriologist.....(Vitamins).....	Miss M. O. Burton
Assistant Bacteriologist.....(Dairy Research).....	K. N. Smith
Assistant Bacteriologist.....(Foods).....	W. E. Ferguson
Assistant Bacteriologist.....(Soils).....	I. L. Stevenson
Assistant Bacteriologist.....(Foods).....	T. W. Humphreys
Assistant Bacteriologist.....(Antibiotics).....	C. K. Hannan

#### BOTANY AND PLANT PATHOLOGY DIVISION

The activities of this division cover two main phases, Economic and General Botany, and Plant Pathology and Mycology.

The work in plant pathology includes research, experimental and administrative activities in connection with diseases affecting agricultural and horticultural crops. The investigations involve the nature and cause of the various diseases, their effects on the plants attacked, and methods for their control, including co-operation with plant breeders in the production of disease-resistant varieties. Intimately related to the plant pathological work are the mycological investigations, the plant disease survey, and the maintenance of the National Mycological Herbarium. Special emphasis is placed on diseases of major economic importance.

The botanical work is concerned with the maintenance and development of the Dominion Arboretum and Botanic Garden; the development of a plant introduction service through a world-wide seed exchange; investigations on the taxonomy and floristics of native and introduced plants (including the maintenance of a large herbarium); the identification of plants for specialists and the general public; investigations on the distribution and life histories of Canadian weeds and poisonous plants (through the Canadian Weed Survey); studies in cytogenetics; and research in plant physiology with special reference to herbicides and to methods of measuring photosynthetic rates.

Chief of Division.....	Dr. J. H. Craigie
Assistant Chief of Division.....	Dr. F. L. Drayton
Administrative Officer.....	Vacant
Librarian.....	Miss D. H. Luke
Head, Botany Unit.....	Dr. H. A. Senn
Senior Botanist.....(Plant Taxonomy).....	Dr. W. G. Dore
Senior Botanist.....(Plant Taxonomy).....	Dr. B. Boivin
Botanist.....(Plant Physiology).....	Vacant
Botanist.....(Weed Investigations).....	Dr. C. Frankton
Associate Botanist.....(Plant Physiology).....	V. A. Helson
Associate Botanist.....(Cytogenetics).....	Dr. R. J. Moore
Associate Botanist.....(Cytogenetics).....	Dr. W. M. Bowden
Associate Botanist.....(Secretary, National Weed Committee).....	E. G. Anderson
Assistant Botanist.....(Plant Taxonomy).....	J. A. Calder
Assistant Botanist.....(Plant Taxonomy).....	J. M. Gillett
Assistant Botanist.....(Plant Taxonomy).....	W. J. Cody
Assistant Botanist.....(Weed Investigations).....	K. K. Bragg
Assistant Botanist.....(Weed Investigations).....	I. J. Bassett
Assistant Botanist.....(Weed Investigations).....	D. R. Lindsay
Assistant Botanist.....(Dominion Arboretum).....	A. R. T. Buckley

Assistant Botanist . . . . .	(Plant Taxonomy) . . . . .	H. L. J. Rhodes
Assistant Botanist . . . . .	(Plant Physiology) . . . . .	Miss W. C. G. Bennett
Head, Mycology Unit . . . . .		Dr. J. W. Groves

Assistant Plant Pathologist . . . . .	(Diseases of Small Fruits) . . . . .	A. T. Bolton
Assistant Plant Pathologist . . . . .	(Diseases of Tree Fruits) . . . . .	J. B. Julien
Senior Plant Pathologist . . . . .	(Seed-borne Diseases) . . . . .	Dr. A. J. Skolko
Associate Plant Pathologist . . . . .	(Disease of Forage Crops) . . . . .	R. J. H. Baylis
Assistant Plant Pathologist . . . . .	(Seed-borne Bacteria) . . . . .	R. M. D. Sutton
Assistant Plant Pathologist . . . . .	(Seed-borne Diseases) . . . . .	V. R. Wallen
Assistant Plant Pathologist . . . . .	(Diseases of Cereals) . . . . .	R. V. Clark
Assistant Plant Pathologist . . . . .	(Microbiology) . . . . .	R. H. Wensley
Assistant Plant Pathologist . . . . .	(Seed-borne Diseases) . . . . .	Miss M. E. Elliott

### CHEMISTRY DIVISION

This division conducts research studies involving the application of chemistry to animal, plant, and soil science. Major fields of work deal with the nutrition and metabolism of the larger domestic animals, vitamin and physiological research using small experimental animals, the mineral requirements of plants, pesticides, and fundamental studies on soil mineralogy and organic matter.

It provides a chemical consulting and analytical service for investigations and research of primary concern to other divisions of the Department. Advisory services are maintained for those interested in the industrial utilization of agricultural products; and the division assists the Department in administering several Federal Acts involving chemical and biological analysis.

Chief of Division . . . . .		Dr. J. C. Woodward
Assistant Chief of Division . . . . .		J. T. Janson
Administrative Officer . . . . .		H. L. Boyd
Head, Food Investigations Unit . . . . .		J. T. Janson

Assistant Chemist.....	(Organic Matter).....	Mrs. D. I. Parker
Assistant Chemist.....	(Fertility).....	L. E. Lutwick
Assistant Chemist.....	(Mineralogy).....	J. E. Brydon

### ENTOMOLOGY DIVISION

This division is responsible for the administration of agricultural entomology and all other entomology except the control of forest insect pests. The activities of the Division have for their object the protection of man and the products of agriculture, industry, and commerce against loss through insect damage; and the development and maintenance of the Canadian National Collection of insects. These activities involve study of the life-histories, habits, and classification of the various insect pests, invention of and improvement in methods of control, and dissemination of relevant information. The work includes surveys of the abundance of injurious insects and general estimates of commercial losses, forecasting of outbreaks, salvage of damaged materials, and provision of advice to individuals, organizations, and other national and provincial government agencies in the suppression of insect outbreaks and the organization of control campaigns. Investigations of the control of injurious pests include the use of fumigants, dusts, and sprays, and methods of application; use of parasites and diseases of injurious insects; and development of special management practices.

The Division co-operates in the administration of the Destructive Insect and Pest Act and the Pest Control Products Act.

#### FOREST BIOLOGY DIVISION

This division, which was established on January 1, 1951, includes the units of Forest Zoology and Forest Pathology. It is responsible for investigations on insects, fungous diseases, and other factors affecting forest and shade trees and forest products. The Division works in close co-operation with federal and provincial forest services and with the lumber and paper industries.

The activities of the Unit of Forest Zoology include studies on noxious forest insects and the development of preventive or control methods by forest management, chemicals, and by the employment of parasites and disease organisms.

In the Unit of Forest Pathology, studies are conducted on the nature and causes of disease in forest and ornamental trees, the objective being to determine methods of prevention which can be applied through forest management.

Chief of Division.....	J. J. de Gryse
Associate Chief of Division.....	Dr. J. E. Bier
Assistant Chief of Division.....	D. E. Gray
Research Assistant and Editorial Adviser.....(Forest Zoology).....	E. B. Watson
Research Assistant and Editorial Adviser.....(Forest Pathology).....	A. W. McCallum

#### PLANT PROTECTION DIVISION

This division is responsible for the enforcement of regulations under the Destructive Insect and Pest Act in respect to import and export shipments of plants and plant products; for the certification, after inspection in the field, in storage, and at shipping points, of potatoes as seed potatoes; for the certification, after inspection in the field, in storage, and at the time of shipment, of flower bulbs produced in British Columbia and for the inspection of ocean vessels at seaboard ports prior to the loading of cargoes of grain and cereal products for export. The Division maintains domestic insect and plant disease quarantines and enforces preventive measures against the introduction of new pests. Control or eradication measures are carried out with regard to foreign pests or diseases which have become established in Canada. Flour mills, warehouses or other

premises are inspected as and when required in order that certificates of health may be issued to meet the requirements of importing countries in respect to plants and plant products exported.

Chief of Division.....	W. N. Keenan
Associate Chief of Division.....	W. A. Fowler
Assistant Chief of Division (Seed Potato Certification).....	J. W. Scannell
Administrative Officer (Plant Inspection).....	S. H. Short
Administrative Officer (Plant Inspection).....	P. N. Vroom
Administrative Officer (Plant Inspection).....	L. L. Reed
Senior Inspector (Seed Potato Certification and Plant Inspection).....	O. W. Lachaine
Senior Inspector (Seed Potato Certification and Plant Inspection).....	N. D. Cass
Inspector.....	E. H. Peters
Technical Officer.....	W. A. Jordan

Assistant Entomologist (Aphid Surveys) . . . . .	D. W. Rideout
Assistant Entomologist (Root Maggots) . . . . .	R. C. Sherwood

*Laboratory of Forest Biology, Unit of Forest Zoology, University of New Brunswick,*

Officer-in-Charge . . . . .	Dr. R. E. Balch
Senior Forest Biologist (Ecology; Forest Management; Population Sampling) . . . . .	Dr. R. F. Morris
Forest Biologist (Forest Insect Survey, In Charge Maritimes) . . . . .	W. A. Reeks
Assistant Forest Biologist (Forest Insect Survey—Systematic to Studies) . . . . .	R. S. Forbes
Assistant Forest Biologist (Natural Control Spruce Budworm) . . . . .	C. A. Miller
Assistant Forest Biologist (Ecological Studies; Newfoundland) . . . . .	W. J. Carroll
Assistant Forest Biologist (Population Studies and Epidemiology) . . . . .	F. E. Webb
Assistant Forest Biologist (Physiological Studies of Birch) . . . . .	J. Clark
Assistant Forest Biologist (Forest Management) . . . . .	H. G. MacGillivray
Assistant Forest Biologist (Forest Insect Survey—Adelginae) . . . . .	G. R. Underwood
Assistant Forest Biologist (Forest Insect Survey—Biological Studies) . . . . .	G. T. Silver
Assistant Forest Biologist (Forest Management) . . . . .	D. O. Greenbank
Assistant Forest Biologist (Forest Insect Survey) . . . . .	D. G. Cameron
Assistant Forest Biologist (Natural Control Balsam Woolly Aphid and Beach Scale) . . . . .	R. C. Clark

**New Brunswick—Continued**

<i>Laboratory of Forest Biology, Unit of Forest Pathology, University of New Brunswick,</i>	
Officer-in-Charge.....	D. R. Redmond
Assistant Forest Biologist (Balsam Fir and Spruce Decay—New Brunswick).....	A. G. Davidson
Assistant Forest Biologist (White Pine Diseases—New Brunswick and Nova Scotia).....	W. K. McGinn
Assistant Forest Biologist (Diseases of Birch—Maritimes).....	J. T. B. Kingston

**Quebec***Quebec City—**Insect Parasite Laboratory, New Forestry School, Laval University,*

Officer-in-Charge.....	L. J. Briand
Assistant Entomologist (Biological Control Forest Insects).....	C. R. F. Davis
Assistant Entomologist (Biological Control Vegetable Insects).....	I. Rivard
Assistant Entomologist (Biological Control Forest Insects).....	J. R. Villeneuve

*Ste. Anne de la Pocatiere—**Laboratory of Plant Pathology, Box 70,*

Officer-in-Charge.....	Dr. J. C. Perrault
Associate Plant Pathologist (Field Crop Diseases).....	Dr. R. O. Lachance
Assistant Plant Pathologist (Potato Diseases).....	H. Genereux
Assistant Plant Pathologist (Vegetable Diseases).....	L. J. Coulombe
Assistant Botanist (Plant Ecology).....	J. G. A. Hamel
Assistant Plant Pathologist (Field Crop Diseases).....	R. Paquin
Assistant Plant Pathologist (Mycology).....	A. Payette

*Field Crop Insect Laboratory*

Officer-in-Charge (Vegetable Insect Investigations).....	J. A. Duncan
Assistant Entomologist (Aphid Surveys and Parasites).....	G. R. Couture

*Hemmingford—**Fruit Insect Laboratory,*

Officer-in-Charge.....	C. E. Petch
------------------------	-------------

*St. Jean—**Sub-Laboratory of Plant Pathology,*

Officer-in-Charge.....	L. Cinq-Mars
Assistant Plant Pathologist (Fruit Diseases).....	R. Crête

*Laboratory of Entomology,*

Officer-in-Charge (Fruit Insect Investigations).....	A. A. Beaulieu
--	----------------

*Fruit Insect Section,*

Assistant Entomologist (Fruit Insect Investigations).....	B. Parent
Assistant Entomologist (Fruit Insect Investigations).....	R. Paradis

*Field Crop Insect Section,*

Officer-in-Charge (Vegetable Insect Studies).....	J. P. Perron
Associate Entomologist (Resistance of plants to aphids).....	J. B. Maltais
Associate Entomologist (Insect Physiology).....	Dr. J. L. Auclair
Assistant Entomologist (Aphid Resistance).....	Miss B. Fortin
Assistant Entomologist (Vegetable Insects).....	J. Lafrance
Assistant Entomologist (Onion Maggot).....	M. Hudon

*Ste. Anne de Bellevue—**Animal Pathology Laboratory, Montreal Area, Macdonald College, Que. (Parasitology)*

Officer-in-Charge.....	Dr. W. E. Swales
------------------------	------------------

**Ontario***Ottawa—*

*Animal Pathology Laboratory, Science Service Building, Carling Avenue, (Poultry Diseases)*  
 Officer-in-Charge ..... Dr. G. L. Bannister  
 Assistant Animal Pathologist ..... Dr. E. W. Bond

*Vegetable Insect Laboratory, Science Service Building, Carling Avenue,*  
 Officer-in-Charge ..... W. G. Matthewman  
 Assistant Entomologist (Insecticides, Vegetable  
 Insects) ..... D. G. Harcourt  
 Assistant Entomologist (Carrot Rust Fly) ..... Dr. H. E. Scott  
 Assistant Entomologist (Root Maggots) ..... W. G. Friend  
 Assistant Entomologist (Carrot Rust Fly) ..... Miss J. B. F. Williams

*Laboratory of Forest Biology, Unit of Forest Zoology, Science Service Building, Carling Avenue,*

Associate Forest Biologist (Bark Beetle and Wood  
 Borer Studies) ..... W. Haliburton  
 Assistant Forest Biologist (Forest Insect Survey—  
 Systematic Studies) ..... Miss M. R. MacKay  
 Assistant Forest Biologist (Spruce Seed and Cone  
 Insects) ..... H. A. Tripp  
 Assistant Forest Biologist (Forest Insect Survey—  
 Liaison) ..... R. F. Beique  
 Assistant Forest Biologist (Forest Insect Survey—  
 Geometrid Larvae) ..... Miss B. A. Michael

*Kingston—*

*Insect Diseases Laboratory, Department of Bacteriology, Queen's University,*  
 Officer-in-Charge ..... Dr. G. E. Bucher  
 Assistant Entomologist (Bacterial Diseases of  
 Insects) ..... Miss J. M. Stephens  
 Assistant Entomologist (Fungus Diseases of Insects) ..... R. B. Baird

*Belleville—*

*Insect Parasite Laboratory, P.O. Box 179,*  
 Officer-in-Charge ..... Dr. A. Wilkes  
 Administrative Officer ..... C. A. S. Smith  
 Entomologist (Field Crop and Pasture Insect Para-  
 sites) ..... R. W. Smith  
 Entomologist (Vegetable and Canning Crop Insect  
 Parasites) ..... G. Wishart  
 Entomologist (Population Ecology and Greenhouse  
 Insects) ..... Dr. T. Burnett  
 Entomologist (Insect Nutrition) ..... Dr. H. L. House  
 Entomologist (Forest Insect Parasites) ..... Dr. H. C. Coppel  
 Associate Entomologist (Biting Fly Parasites; Refer-  
 ence Collection) ..... H. G. James  
 Associate Entomologist (Fruit Insect Parasites) ..... Dr. D. P. Pielou  
 Associate Entomologist (Biological Control of Weeds) ..... Dr. J. M. Smith  
 Assistant Entomologist (Spruce and Pine Sawflies) ..... W. F. Baldwin  
 Assistant Entomologist (Spruce and Pine Sawflies) ..... L. R. Finlayson  
 Assistant Entomologist (Taxonomy Parasitic Insects) ..... Dr. J. C. Martin  
 Assistant Entomologist (Host Parasite Conditioning) ..... L. G. Monteith  
 Assistant Entomologist (Spruce and Pine Sawflies) ..... Mrs. T. U. Finlayson  
 Assistant Entomologist (Forest Insect Parasites) ..... Miss A. E. Monteith  
 Assistant Entomologist (Fruit Insect Parasites) ..... R. F. Glasser  
 Assistant Entomologist (Forest Insect Parasites) ..... A. P. Arthur  
 Assistant Entomologist (Grasshopper Parasites) ..... A. J. Howitt  
 Assistant Entomologist (Vegetable Insect Parasites) ..... G. E. Maybee  
 Assistant Entomologist (Forest Insect Parasites) ..... A. R. Graham  
 Assistant Entomologist (Research Technical Services) ..... Miss J. F. Bronskill  
 Assistant Entomologist (Vegetable and Canning  
 Crop Parasites) ..... E. H. Colhoun  
 Assistant Entomologist (Forest Insect Parasites) ..... H. G. Wylie  
 Assistant Entomologist (Insect Nutrition) ..... M. G. Maw  
 Assistant Entomologist ..... B. C. Smith  
 \*Assistant Entomologist (Vegetable Insect Inves-  
 tigations) ..... J. E. Armand  
 Assistant Entomologist ..... M. L. Boyd

**Ontario—Continued***Marmora—*

*Field Crop Insect Seasonal Laboratory,*  
Officer-in-Charge (White Grub Investigations) ..... G. H. Hammond

*Vineland—*

*Fruit Insect Laboratory,*  
Officer-in-Charge ..... G. G. Dustan  
Entomologist (Ecology) ..... W. L. Putman  
Associate Entomologist (Codling Moth) ..... W. G. P. Garlick  
Associate Entomologist (Stone Fruit and Pear  
Insects) ..... T. Armstrong  
Associate Entomologist (Insect Vectors of Stone  
Fruit Virus Diseases) ..... J. H. H. Phillips  
Assistant Entomologist (Biology Oriental Fruit  
Moth) ..... R. C. Miller  
Assistant Entomologist (Insect Population Studies) ..... S. E. Brown  
Assistant Entomologist (Effect of Spraying Materials  
on Peach Trees) ..... A. Hikichi

*Toronto—*

\**Laboratory of Forest Biology, Unit of Forest Pathology, 144 Front Street West,*  
Forest Biologist (Organization, Establishment, and  
Supervision of Field Crews) ..... Dr. L. T. White  
Associate Forest Biologist (Forest Disease Survey;  
Toronto Herbarium) ..... Dr. D. A. Quirke  
Assistant Forest Biologist (Pathological Deteriora-  
tion Fire-killed Timber) ..... J. T. Basham  
Assistant Forest Biologist (White Pine Needle Blight) ..... B. W. Dance  
Assistant Forest Biologist (White Pine Blister Rust) ..... E. Eggertson  
Assistant Forest Biologist (Smelter Fume Injury) ..... J. A. Ham  
Assistant Forest Biologist (Plantation and Nursery  
Stock Diseases) ..... J. Cockerill

\**Laboratory of Forest Biology, Unit of Forest Zoology, 114 Front Street West,*  
Associate Forest Biologist (Control of Insects  
Affecting Plantations, Shade Trees, Orna-  
mentals and Nursery Stock) ..... K. E. Stewart  
Assistant Forest Biologist (Dutch Elm Disease  
Vector Control) ..... R. J. Finnegan  
Assistant Forest Biologist (European Pine Shoot  
Moth, Juniper Scale Control) ..... C. C. S. Kirby

*St. Catharines—*

*Laboratory of Plant Pathology, Box 87,*  
Officer-in-Charge (Virus Diseases of Stone Fruits) ..... Dr. G. H. Berkeley  
Plant Pathologist (Virus Diseases of Fruit) ..... Dr. R. S. Willison  
Associate Plant Pathologist (Fruit Diseases) ..... G. C. Chamberlain  
Associate Plant Pathologist (Vegetable Diseases) ..... J. K. Richardson  
Associate Plant Pathologist (Microbiology) ..... Dr. R. G. Atkinson  
Associate Plant Pathologist (Diseases of Greenhouse  
Crops) ..... J. D. Gilpatrick  
Assistant Plant Pathologist (Plant Histology—  
Viruses) ..... Dr. M. Weintraub  
Assistant Plant Pathologist (Vegetable Diseases) ..... W. G. Kemp  
Assistant Plant Pathologist (Fruit Diseases) ..... Vacant

*Laboratory of Bacteriology, Box 87,*

Officer-in-Charge (Soil Microbiology) ..... Vacant

*Simcoe—*

*Fruit Insect Laboratory, 315 Main Street,*  
Officer-in-Charge ..... J. A. Hall

\* Until August 1, 1952; thereafter, Maple, Ontario.

**Ontario—Continued***London—**Bacteriology Section, Science Service Laboratory, University Sub Post Office,*

Principal Bacteriologist.....	Dr. C. L. Hannay
Senior Bacteriologist (Soils).....	Dr. J. W. Rouatt

## EXPERIMENTAL FARMS SERVICE

HEADQUARTERS: CENTRAL EXPERIMENTAL FARM, OTTAWA

DIRECTOR—DR. E. S. HOPKINS

The Experimental Farms Service with headquarters at Ottawa, together with branch stations and laboratories in important agricultural regions throughout Canada, provides a broad program of experimental and research work in a wide field of agricultural problems. The Service is organized under the office of the Director with the following ten Divisions:—Animal Husbandry; Apiculture; Cereals; Economic Fibre; Field Husbandry, Soils and Agricultural Engineering; Forage Plants; Horticulture; Illustration Stations; Poultry; and Tobacco. These divisions, in addition to carrying on research at Ottawa co-ordinate the work in their particular field conducted on the branch stations throughout the country. Branch stations may specialize with reference to the type of agriculture practised in their districts, and experimental projects are undertaken in areas where the results will have direct application. The services of trained specialists at headquarters are available to all the branch stations, and discoveries at any station are adapted to other stations where they have prospect of success. This type of organization combines the advantages of centralized research with wide contact and co-operation with farmers and other agricultural agencies.

### ADMINISTRATION

Director.....	Dr. E. S. Hopkins
Assistant to Director.....	H. C. Ensor
Research Officer (Projects).....	Dr. R. R. McKibbin
Research Officer (Projects).....	Dr. A. Deakin
Research Specialist.....	W. Dickson
Agricultural Architect.....	F. W. Graves
Agricultural Architect.....	H. H. Merrill
Accountant.....	B. W. Porter
Personnel Officer.....	C. J. Gillissie
Public Relations Officer.....	J. H. Leroux
Librarian.....	Miss M. A. Uhrich

### ANIMAL HUSBANDRY DIVISION

This Division conducts experimental and research work relative to the production of beef cattle, dairy cattle, sheep, swine, horses and fur-bearing animals. Breeding, nutrition, housing and management are among the problems under investigation. Studies in the field of dairy research are also undertaken, including methods of producing clean milk and the manufacture of milk products.

Chief, Animal Husbandry Division.....	Dr. H. K. Rasmussen
Principal Animal Husbandman (Swine).....	E. B. Fraser
Senior Animal Husbandman (Beef Cattle).....	P. E. Sylvestre
Senior Animal Husbandman (Dairy Cattle).....	Vacant
Senior Animal Husbandman (Sheep).....	S. B. Williams
Senior Animal Husbandman (Dairy Cattle and Horses).....	V. S. Logan
Senior Animal Geneticist.....	F. K. Kristjansson
Animal Husbandman (Swine).....	C. G. Hickman
Dairy Specialist (Dairying).....	C. A. Gibson
Junior Animal Husbandman (Beef Cattle).....	B. MacCarthy
Junior Animal Husbandman (Sheep).....	W. H. Hough
Junior Animal Husbandman (Dairy Cattle).....	V. J. Miles

### APICULTURE DIVISION

This Division conducts experimental and research work for the improvement of apicultural practices throughout the honey producing areas of Canada. Among the problems being investigated are wintering, management, breeding and the evaluation of protein supplement feeds for brood rearing. Investigations are conducted on honey, in relation to fermentation, pasteurization and to the improvement of honey-house equipment.

In co-operation with other divisions of the department, special attention is given to the problems of disease with bees, to the value of honeybees in relation to seed and fruit production and to the toxicity of various insecticides to honeybees under field conditions.

Chief Apiculture Division.....	C. A. Jamieson
Senior Apiculturist.....	E. Braun
Junior Apiculturist.....	G. H. Austin
Junior Apiculturist.....	T. Pankiw

### CEREAL DIVISION

The activities of the Cereal Division embrace the breeding and selection of wheat, oats, barley, flax, and such miscellaneous crops as beans, peas, buckwheat, and safflower.

Testing varieties and strains of these cereal hybrids and selections in comparison with named varieties forms an important phase of the work and involves evaluating their various qualities, such as early maturity, straw strength, resistance to such disease as leaf rust, and stem rust, loose smut, bunt mildew and other diseases particularly damaging to the respective cereals. Special milling and baking quality studies are made in the case of wheat varieties in respect to their suitability for the bread and pastry flour trade. Tests are made on the feeding quality of oats and the malting of barley varieties. Flax varieties are tested for their iodine content and their suitability for the paint and varnish trade.

Other activities of this Division include the investigation of special problems which have a bearing on cereal breeding and development work.

Chief, Cereal Division.....	Dr. C. H. Goulden
Principal Cerealist (Winter Wheat and Wheat Quality).....	A. G. O. Whiteside
Principal Cerealist (Oats).....	R. A. Derick
Senior Cerealist (Spring Wheat).....	J. G. C. Fraser
Senior Cerealist (Barley and Peas).....	P. R. Cowan
Senior Cerealist (Flax, Beans).....	Dr. W. G. McGregor
Senior Cerealist (Barley).....	Dr. D. G. Hamilton
Senior Cerealist (Spring Wheat).....	F. Gfeller
Junior Cerealist (Oats).....	F. J. Zillinsky
Junior Cerealist (Flax, Beans).....	D. R. Hansen
Technician (Milling and Baking).....	H. Miller
Technician (Winter Wheat).....	J. Edgar
Statistician.....	G. Ballantine

### FIBRE DIVISION

This Division conducts investigational work relating to the production of fibre crops in Canada, and studies problems in the processing and marketing of these fibres. Experimental work, mainly with flax, includes the testing of a large number of varieties selected in this country or introduced from other countries, plant breeding and selection, rotations, commercial fertilizers, machinery, weed control, and other work with various cultural and processing practices.

Chief, Fibre Division.....	R. J. Hutchinson
Agronomist.....	L. A. Cabana

### FIELD HUSBANDRY, SOILS AND AGRICULTURAL ENGINEERING DIVISION

The work of this Division is conducted under three headings. Field Husbandry studies cover the adaptation of crops to various conditions as well as crop rotations and crop sequence. Methods of planting, cultivation, harvesting and storage of crops, weed control and pasture management are other matters under investigation.

Soil surveys are conducted by the Soils Section in co-operation with each of the provinces and in the territories of Northern Canada. Soils are classified according to type and productivity rating. Research is in progress on the nature

and formation of soils, the relation of climate to soils, crop zonation, and saline soils. Investigations in the use of manure, commercial fertilizers, green manure, and soil amendments to increase soil productivity constitute a major field of work. Wind and water erosion control studies are also undertaken at a number of stations.

In the Soil Research Laboratory at Swift Current, laboratory investigations include work on soil moisture and temperature relations, effect on shelterbelts, soil organic matter, wind and water erosion, occurrence of selenium and other soil problems.

Agricultural engineering, investigations concern the use, efficiency, and cost of operating farm machinery. Other fields of study include drainage and irrigation, farm power and ventilation of farm buildings.

Chief, Field Husbandry Division..... Dr. P. O. Ripley

#### Field Husbandry and Soil Sections

Principal Pedologist.....	Dr. A. Leahy
Principal Pedologist.....	Dr. P. C. Stobbe
Senior Agronomist (Soil Management East).....	A. J. MacLean
Senior Agronomist (Soil Management West).....	K. W. Hill
Agronomist (Weed Control).....	G. Knowles
Agronomist (Pasture Management).....	S. M. Donaldson
Agronomist (Soil Fertility).....	W. E. Cordukes
Junior Agronomist (Projects and Records).....	N. Gordon
Pedologist.....	J. Millette
Cartographer.....	H. Nicol

#### Agricultural Engineering Section

Senior Agricultural Engineer.....	J. M. Armstrong
Senior Agricultural Engineer.....	W. Kalbfleisch
Agricultural Engineer.....	D. J. Cooper
Junior Agricultural Engineer.....	A. I. Magee
Junior Agricultural Engineer.....	J. W. White

Pedologist.....	R. E. Wicklund
Junior Pedologist.....	K. Langmaid
Junior Pedologist.....	S. W. Reeder

*Quebec—Macdonald College*

Pedologist.....	P. Lajoie
Junior Pedologist.....	J. J. L. Leclerc

*—Agricultural College, Ste. Anne de la Pocatiere*

Pedologist.....	R. Baril
Junior Pedologist.....	B. Rochefort

*Ontario—Ontario Agricultural College, Guelph*

Pedologist.....	J. E. Gillespie
Pedologist.....	D. W. Hoffman
Junior Pedologist.....	A. B. Olding

*Manitoba—University of Manitoba, Winnipeg*

Senior Pedologist.....	W. A. Ehrlich
Pedologist.....	E. A. Poyer
Junior Pedologist.....	L. E. Pratt

*Saskatchewan—University of Saskatchewan, Saskatoon*

Senior Pedologist.....	H. C. Moss
Pedologist.....	J. S. Clayton
Pedologist.....	W. K. Janzen
Junior Pedologist.....	R. J. St. Arnaud

*Alberta—University of Alberta, Edmonton*

Senior Pedologist.....	W. E. Bowser
Pedologist.....	T. W. Peters
Pedologist.....	F. W. Schroer
Junior Pedologist.....	J. Leat
Junior Pedologist.....	A. A. Kjearsgaard

*British Columbia—University of British Columbia, Vancouver*

Senior Pedologist.....	L. Farstad
Pedologist.....	A. P. Tzogoeff
Junior Pedologist.....	T. M. Lord
Junior Pedologist.....	J. H. Day

**FORAGE PLANTS DIVISION**

This division is concerned with the improvement of hay and pasture plants. While research is chiefly in the field of plant breeding, many different phases of field experimental work are in progress. Among these are included the testing of species, varieties and strains, both domestic and foreign; pasture and rangeland investigations; methods relating to seed production of legume crops in particular, and to cross pollinated species in general; foundation stock seed multiplication and processing, and various phases of turf grasses research.

Work relating to the development of improved varieties is concentrated chiefly at the Central Experimental Farm, Ottawa, and at the Dominion Forage Crops Laboratory, Saskatoon, Sask.

Chief, Forage Plants Division.....	Dr. T. M. Stevenson
Principal Agrostologist (Corn, Soybeans, and Sugar Beets —breeding and related research).....	Dr. F. Dimmock
Principal Cytogeneticist (Cytological Investigations, Genetics, Induced Polyploidy, and Plant Introduc- tions).....	Dr. J. M. Armstrong
Principal Agrostologist (Grass Breeding, Seed Produc- tion and Related Research).....	R. M. MacVicar
Senior Agrostologist (Root Breeding, Statistics, Hay and Pasture Investigations and Related Research).....	F. S. Nowosad
Senior Agrostologist (Turf-grass—Breeding and Research, Weed Control and Chemical Research).....	J. H. Boyce
Senior Agrostologist (Alfalfa and Clover Breeding, and Related Research).....	H. A. McLennan
Senior Agrostologist (Grass Breeding and Related Research).....	W. R. Childers
Agrostologist (Corn, Soybeans, and Sugar Beets).....	Dr. F. S. Warren
Junior Agrostologist (Grass Breeding and Seed Produc- tion).....	D. R. Gibson
Junior Agrostologist (Cytology and Forage Plant Intro- ductions).....	R. W. Robertson
Junior Agrostologist (Pastures).....	L. S. Donovan

**HORTICULTURE DIVISION**

This Division deals with the problems encountered in the culture of fruits, vegetables, and ornamentals. It embraces the breeding of orchard and small fruits, vegetables, and ornamentals. It covers the testing and evaluation of new varieties originated by this Division and other plant breeders. It conducts field or laboratory work in nutritional studies, plant physiology, genetics, cytology, and histology. This Division also operates a low-temperature research laboratory for the purpose of studying problems on the storage of horticultural crops, and a fruit and vegetable products laboratory to investigate the problems of processing these food crops.

A substation is operated at Ste. Clothilde, Que., to study the problems of growing horticultural crops in the mucklands of that area. At Smithfield, Ont., a second substation examines those problems encountered in the culture of fruits and vegetables with emphasis on canning crops.

Chief, Horticulture Division .....	M. B. Davis
Principal Horticulturist (Plant Physiology) .....	Dr. H. Hill
Principal Horticulturist (Fruits) and Officer-in-Charge, Substation, Smithfield, Ont. ....	D. S. Blair
Principal Horticulturist (Vegetable Crops) .....	W. Ferguson
Principal Horticulturist (Cytogenetics) .....	Dr. A. W. S. Hunter
Senior Horticulturist (Vegetable Crops) .....	L. H. Lyall
Senior Horticulturist (Low Temperature Research) .....	W. R. Phillips
Senior Horticulturist (Ornamentals) .....	R. W. Oliver
Senior Horticulturist (Co-operative Experiments) and Officer-in-Charge, Substation, Ste. Clothilde, Que. ....	F. S. Browne
Senior Horticulturist (Biometrics and Statistics) .....	Dr. H. B. Cannon
Senior Horticulturist (Histology and Morphology) .....	Dr. Mary MacArthur
Senior Horticulturist (Floriculture and Greenhouse Crops) ..	Dr. A. P. Chan
Senior Food Technologist (Fruit and Vegetable Pro- cessing) .....	P. A. Buck
Senior Horticulturist (Potato Specialist) .....	N. M. Parks
Artist .....	A. Kellett
Senior Horticulturist (Low Temperature Research) .....	P. A. Poapst
Senior Horticulture (Native Fruits at Kentville, N.S.) ..	E. L. Eaton
Horticulturist (Vegetable Crops) .....	J. J. Jasmin
Horticulturist .....	L. P. Spangelo
Horticulturist (Fruit Tree Investigations, Bedford, Que.) ..	P. Roy
Horticulturist (Ornamentals) .....	D. F. Cameron
Junior Horticulturist (Plant Physiology) .....	H. B. Heeney
Junior Horticulturist .....	S. H. Nelson
Junior Horticulturist (Fruit Investigations at Morden, Man.) .....	R. W. Birch
Junior Horticulturist (Biometrics and Statistics) .....	H. F. Beingessner
Food Technologist (Fruits and Vegetable Processing) ..	P. N. Townsley
Junior Horticulturist (Cytogenetics) .....	G. W. R. Walker

#### *Co-operative Horticultural Projects*

Certain officers of the Horticultural Division are employed on projects conducted in co-operation with provincial institutions, as indicated below.

Horticulturist (Potato Breeding Investigations in Co- operation with the Ontario Agricultural College, Guelph, Ont.) .....	N. R. Thomson
Junior Horticulturist (Vegetable Crop Experiments in Co-operation with the Provincial Horticultural Station, Vineland, Ont.) .....	I. D. W. Smith
Junior Horticulturist (Vegetable Crop Experiments in Co-operation with the University of Manitoba, Winnipeg, Man.) .....	H. R. Hikida
Junior Horticulturist (Horticultural Experiments in Co-operation with the University of Saskatchewan, Saskatoon, Sask.) .....	P. O. Bergh
Junior Horticulturist (Fruit Investigations in Co-opera- tion with the University of Alberta, Edmonton, Alta.) ..	W. D. Evans
Junior Horticulturist (Vegetable Crop Experiments in Co- operation with the University of British Columbia, Vancouver, B.C.) .....	J. B. Tier

#### **ILLUSTRATION STATIONS DIVISION**

This Division undertakes experimental and fact-finding studies relating to agricultural production problems in areas distantly removed from the Experimental Farms in each province. Illustration Stations are located on privately owned farms and are operated on the basis of a co-operative agreement with the owner. These station farms are representative of variations occurring within the major soil and climatic zones, and the experiments are designed to determine the effect of these conditions on farm organization and management, fertilizer

treatments, crop varieties, economics of production resulting from irrigation, contour and grass farming, and weed control, as well as the efficient use of farm machinery.

The experimental work on these stations is conducted by a supervisor in co-operation with the technical personnel at each Experimental Farm.

*Officers Located on the Central Experimental Farm, Ottawa*

Chief, Division of Illustration Stations.....	J. C. Moynan
Associate Chief, Division of Illustration Stations.....	A. E. Barrett
Agronomist (Illustration Stations).....	R. R. Cairns
Agronomist (Illustration Stations, Western Quebec).....	L. J. Bellefleur
Agronomist (Illustration Stations, Eastern Ontario).....	L. M. Casserly
Agronomist (Illustration Stations, Manitoulin District) ..	C. B. Dalton
Agronomist (Illustration Stations, Fort William District) ..	J. K. Knights

*Officers Located on Branch Experimental Stations*

Junior Agronomist (Illustration Stations, St. John's, Nfld) .....	M. F. Gillis
Agronomist (Illustration Stations, Charlottetown, P.E.I.) .....	W. N. Black
Agronomist (Illustration Stations, Kentville, N.S.) .....	F. B. Kinsman
Junior Agronomist (Illustration Stations, Nappan, N.S.) ..	F. Calder
Agronomist (Illustration Stations, Fredericton, N.B.) .....	E. A. Grant
Agronomist (Illustration Stations, Ste. Anne de la Pocatiere, Que.) .....	R. Caron
Junior Agronomist (Illustration Stations, Normandin, Que.) .....	G. H. Harvey
Agronomist (Illustration Stations, Lennoxville, Que.) .....	J. O. P. Allard
Junior Agronomist (Illustration Stations, Kapuskasing, Ont.) .....	R. Bernier
Agronomist (Illustration Stations, Brandon, Man.) .....	B. J. Gorby
Junior Agronomist (Illustration Stations, Brandon, Man.) .....	D. A. Duncan
Agronomist (Illustration Stations, Indian Head, Sask.) .....	R. N. McIver
Agronomist (Illustration Stations, Melfort, Sask.) .....	K. E. Bowren
Junior Agronomist (Illustration Stations, Melfort, Sask.) .....	A. R. Mack
Agronomist (Illustration Stations, Scott, Sask.) .....	C. H. Keys
Junior Agronomist (Illustration Stations, Scott, Sask.) .....	W. B. Towill
Agronomist (Illustration Stations, Swift Current, Sask.) .....	N. A. Korven
Junior Agronomist (Illustration Stations, Swift Current, Sask.) .....	J. H. Wiley
Junior Agronomist (Illustration Stations, Lethbridge, Alta.) .....	A. D. Smith
Agronomist (Illustration Stations, Lacombe, Alta.) .....	A. W. Wilton
Agronomist (Illustration Stations, Lacombe, Alta.) .....	L. J. Anderson
Agronomist (Illustration Stations, Beaverlodge, Alta.) .....	D. J. Macdonald
Junior Agronomist (Illustration Stations, Beaverlodge, Alta.) .....	A. N. F. Longair
Agronomist (Illustration Stations, Creston, B.C.) .....	F. M. Chapman
Agronomist (Illustration Stations, Agassiz, B.C.) .....	R. M. Hall
Junior Agronomist (Illustration Stations, Saanichton, B.C.) .....	E. H. Gardner
Junior Agronomist (Illustration Stations, Prince George, B.C.) .....	B. C. L. Appleby

### Poultry Division

This division conducts research into problems of genetics, nutrition, and management of poultry.

The work includes a study of the most suitable breeding methods for improvement of egg production as well as for meat type. A new breed has been developed and is under test for possible use in producing an efficient commercial meat chicken. Breeding problems peculiar to the handling of other species such as turkeys, geese, and ducks are under experiment.

Nutrition problems related to growth, egg production, fertility, hatchability, and viability are continuously under investigation. Two relatively new and promising lines of research involve the investigation of the role of the sex hormones and antibiotics in the nutrition of the species.

Under management are considered various methods of incubation, brooding, rearing, feeding equipment, housing, and ventilation, as well as the economics involved therein. Marketing problems, as influenced by genetics, nutrition, and management, are also a subject of investigation.

Chief, Poultry Division.....	H. S. Gutteridge
Senior Poultry Husbandman.....	A. S. Johnson
Senior Poultry Geneticist.....	Dr. R. S. Gowe
Senior Poultry Nutritionist.....	Dr. J. R. Aitken
Junior Poultry Geneticist.....	E. S. Merritt

### TOBACCO DIVISION

This Division is responsible for research and experimental work in connection with the development of tobacco production in Canada. Investigational activities include varietal testing, plant breeding, and the development of new varieties. Cultural and curing methods as well as methods of harvesting tobacco are studied. The effect of fertilizers in relation to soil analysis constitutes a major problem. The Division also assists in the development of markets and maintains a statistical record of all pertinent economic data.

Physiological and chemical investigations are being conducted to elucidate some of the fundamental relationships involved in the production of high quality leaf. The metabolism of the leaf during growth and the biochemical changes during curing and fermentation are being intensively studied. The physiological aspects of tobacco nutrition are being investigated using pure chemicals under controlled conditions in the greenhouse to obtain information not obtainable from field experiments.

Chief, Tobacco Division.....	Dr. N. A. MacRae
Senior Plant Nutritionist.....	E. T. McEvoy
Senior Agronomist.....	L. E. Gilmore
Senior Plant Geneticist.....	F. H. White

### BRANCH STATIONS AND LABORATORIES

In order to obtain information applicable to the wide range of soil and climatic conditions throughout Canada, 28 Branch Stations and 20 Substations have been established in the more important agricultural regions. In addition, there are 14 special laboratories. Most of these laboratories are located on the experimental stations although some are at the provincial agricultural colleges. The laboratories undertake special investigations in connection with problems associated with special types of farming or branches of agriculture in regions where these problems exist.

Soil survey work in Canada is conducted co-operatively by each of the provinces and the Experimental Farms Service. The Experimental Farm soil surveyors are located in most instances at the provincial agricultural colleges.

**BRANCH LABORATORIES**

¶ In addition to the laboratories at the Central Experimental Farm, Ottawa, there are the following fourteen special branch laboratories:

Potato Breeding Laboratory,  
 Dominion Experimental Station, Fredericton, N.B.

Fruit and Vegetable Products and Low Temperature Laboratories,  
 Dominion Experimental Station, Kentville, N.S.

Poultry Nutrition Laboratory,  
 Dominion Experimental Farm, Nappan, N.S.

Dominion Cereal Breeding Laboratory,  
University of Manitoba, Winnipeg, Man.

Vegetable Products Laboratory,  
Dominion Experimental Station, Morden, Man.

Pilot Flax Mill and Laboratory,  
Portage la Prairie, Man.

Poultry Nutrition Laboratory,  
Dominion Experimental Farm, Brandon, Man.

Dominion Forage Laboratory,  
University of Saskatchewan, Saskatoon, Sask.

Agricultural Engineering Workshop and Laboratory,  
Dominion Experimental Station, Swift Current, Sask.

Dominion Soil Research Laboratory,  
Dominion Experimental Station, Swift Current, Sask.

Animal Nutrition Laboratory,  
Dominion Experimental Station, Lethbridge, Alta.

Wool Laboratory,  
Dominion Experimental Station, Lethbridge, Alta.

Vegetable Products and Sugar Beet Laboratory,  
Dominion Experimental Station, Lethbridge, Alta.

Fruit and Vegetable Products and Low Temperature Laboratories,  
Dominion Experimental Station, Summerland, B.C.

## PRODUCTION SERVICE

HEADQUARTERS: CONFEDERATION BLDG., OTTAWA

DIRECTOR—N. YOUNG

The Production Service includes the Health of Animals, the Plant Products, and the Livestock and Poultry Divisions. The Service coordinates the work of the federal and provincial field staffs in interpreting to farmers ways to profitable production derived from information with respect to the activities of the Experimental Farms and Science Services, and from the intimate association of the Marketing Service with agricultural commerce. The Production Service administers legislation designed to prevent the introduction and spread of diseases of animals, and to ensure freedom from disease in animals and animal products exported; to provide for the incorporation of purebred livestock associations; and to standardize the sale in the domestic market of meat and canned foods, seed, feeding stuffs, fertilizers, agricultural products, agricultural poisons, hay, straw, and binder twine. The functions of the several Divisions are indicated below.

### ADMINISTRATION

Director.....	N. Young
Assistant to Director.....	L. A. Bissell
Accountant.....	H. A. Kelly
Personnel Officer.....	G. Labelle

### HEALTH OF ANIMALS DIVISION

This Division is responsible for the administration of the Regulations made under the authority of the Animal Contagious Diseases Act, and the regulations governing the Inspection of Meats made under the authority of the Meat and Canned Foods Act.

Under the authority of the Animal Contagious Diseases Act, the movement of livestock and livestock products into and out of Canada is controlled for the purpose of preventing introduction into Canada of destructive animal diseases, and to prevent the exportation of diseased livestock, or diseased or unwholesome livestock products. This Act also provides for the control and eradication of

named and transmissible animal diseases within Canada, and for the operation of programs having as their objectives the eradication of non-reportable animal diseases such as bovine tuberculosis and brucellosis.

Under authority of the Meat and Canned Foods Act provision is made for the supervision of the operation of packing plants engaged in export trade, either inter-provincial or foreign, from the ante-mortem inspection of meat food animals to the proper labelling, packaging, and shipment of the finished product. No packing plant may engage in export trade unless under Departmental supervision. This is extended only to plants that meet sanitary requirements and whose volume of business is sufficient to justify supervision.

------------------------------	--

**PLANT PRODUCTS DIVISION**

This Division administers Acts respecting seed, feeding stuffs, fertilizers, pest control products, hay and straw, flax fibres, and binder twine. The Division also carries out policies respecting the improvement and distribution of seeds, feeding stuffs, fertilizers, pesticides, and flax fibres.

The work is handled by three units: Inspection Services which administer the Acts and supervise promotional work; Laboratory Services which analyse samples taken for enforcing the Acts and for investigational purposes; and Seed Production Services which promote the production and distribution of improved seed.

The Division collaborates with various agencies in promotional work respecting seeds, feeding stuffs, fertilizers, pesticides, flax fibres, hay, and agricultural lime. Subsidies to the provinces for encouraging an increased and better use of agricultural lime are administered by the Division as well as a freight assistance policy on the movement of feed grain and wheat millfeeds from the Prairie Provinces to the East and to British Columbia.

## MARKETING SERVICE

HEADQUARTERS: CONFEDERATION BLDG., OTTAWA

DIRECTOR—L. W. PEARSALL

Marketing Service is responsible for the administration of grading and inspection services covering livestock and livestock products, poultry, eggs, ranched fox furs, dairy products, fruit, vegetables, canned goods, maple products and honey, as well as departmental advertising. It brings under central control, all market reporting services for these commodities. The service to consumers deals particularly with graded products and their identification, and supplies information on the best methods of using Canadian foods, especially those which are in abundant supply. Associated as a fact-finding body in connection with the economics of marketing as well as of production is the Agricultural Economics Division.

### ADMINISTRATION

Director.....	L. W. Pearsall
Assistant to Director.....	R. W. Neely
Accountant.....	J. Blackburn
Personnel Officer.....	T. B. G. Rankin

### ADMINISTRATIVE DIVISION

This Division is responsible for the general administration of the Marketing Service and deals with matters of common concern to all Divisions, such as advertising, market information, consumer service, and the overseas office of the Agricultural Counsellor in London, England.

### OVERSEAS OFFICE

The Agricultural Counsellor in London, England, and his staff keep a close check on the standards and quality of Canadian produce arriving in the United Kingdom, and keep Department officials informed on matters of this kind, especially the suitability of Canadian produce to meet the demands of the British consumer.

Agricultural Counsellor.....	J. G. Robertson, Canada House, London, England.
------------------------------	---

### MARKETS INFORMATION SECTION

This Section edits and publishes daily, weekly, monthly, and annual reports on the commercial marketings of livestock, dairy products and fruits and vegetables, on the domestic and export markets. Market comment and trends are noted and statistics on quality, prices, numbers, or amount are compiled and distributed to the various sections of the industry across Canada. Additional data in the form of special information is tabulated and assembled for the use of various committees and boards, or to meet specific enquiries from producers or others engaged in the marketing of farm products.

Chief, Markets Information.....	R. M. Scott
Assistant.....	P. A. Cossmann
Assistant.....	A. W. Ryan

### CONSUMER SERVICE SECTION

The chief function of the Consumer Section is to further develop the domestic market for Canadian agricultural food products. Information on buying and using foods originating on Canadian farms is widely disseminated among consumers. From time to time, consumer food preferences and opinions are referred

to the branch of agriculture concerned. Grading and other regulations, governing the manufacture and sale of foods, that are under the jurisdiction of the Department are brought to public attention.

### AGRICULTURAL ECONOMICS DIVISION

The Economics Division serves as a fact-finding body in matters relating to production, marketing, and agricultural policies. Studies are carried on in farm management, land economics, farm finance, the marketing of farm products and factors affecting consumption. Detailed records are maintained on the operations of co-operative organizations, and agricultural policies and developments in other countries are kept under continuous review. The Division publishes the following periodicals: The Economic Annalist, the Current Review of Agricultural Conditions in Canada, and Agriculture Abroad.

**DAIRY PRODUCTS DIVISION**

The activities of this Division are conducted mainly under three heads. The Administrative Unit maintains supervision of all activities of the Division, and keeps in touch with developments of the dairy industry throughout the world. Markets and Merchandising Services render a variety of services to the industry in relation to the marketing of dairy products. A publication respecting dairying throughout the world is issued each month in conjunction with the Economics Division and enjoys a large circulation. The Grading and Inspection Services enforce the requirements of the Dairy Industry Act and Regulations, dealing with the manufacture and sale of dairy products and the grading of dairy produce. Dairy Produce Graders and Inspectors of Dairy Products are located in all provinces at convenient points, to perform the duties of grading and inspecting dairy products. Regulations under the Meat and Canned Foods Act, pertaining to concentrated milk products, are also administered by this unit.

### FRUIT AND VEGETABLE DIVISION

The work of this Division is concerned mainly with administration of the Fruit, Vegetables and Honey Act; the Maple Products Industry Act, and the Processed Fruit and Vegetable Regulations under the Meat and Canned Foods Act. Under the administrative unit, three sections—Inspection, Canning, and Marketing—enforce this legislation.

*Inspection*—Fresh fruits and vegetables, domestic and imported, honey and maple products are inspected for grade, marking and packages at shipping point and destination, and inspection certificates are issued both as to grade and condition. Where inspectors are available, administrative inspections are made on local markets to check quality and condition.

*Canning*—Processed fruits and vegetables, domestic and imported, are inspected; labels therefor are approved; operations of registered establishments are supervised, and a check is made of sanitary conditions and grading of the pack as to quality.

*Marketing*—Interprovincial and international dealers and brokers are licenced to operate in fresh fruits and vegetables. Assistance is given to growers, growers' associations, and distributors in finding new markets and advising as to market conditions. This unit acts as operating section of the Agricultural Prices Support Board in fruits, vegetables and kindred products.

**LIVESTOCK AND LIVESTOCK PRODUCTS DIVISION**

This Division consists of three sections—Livestock, Poultry and Furs. It administers the Livestock and Livestock Products Act and engages in activities relating to the merchandising of livestock and poultry products and ranched furs.

The Livestock section administers regulations under the Act relating to the grading of hog, beef, lamb, mutton, and veal carcasses, export bacon, and wool, as well as the control of trading on stockyards. The stockyards and grading staffs are also responsible for assembling at central markets and packing houses information regarding volume of livestock sales, prices, and related information.

The Poultry Section administers regulations relating to the grading and inspection of eggs, poultry, frozen egg, and canned poultry. The senior officer at Ottawa and the District officers are also responsible for the direction of the poultry staff of the Production Service and for the administration of that section of the Act and regulations relating to poultry production.

The Fur Section administers regulations for the grading of ranched furs and engages in activities related to the merchandising and promotion of Canadian furs.

Livestock Products Grader.....	H. L. Ford, Box 128, Vancouver.
Fur Grader.....	N. L. Boyd, 1370 Richards St., Vancouver.

**SPECIAL ACT ADMINISTRATIONS****PRAIRIE FARM REHABILITATION ADMINISTRATION**

The Prairie Farm Rehabilitation Act, commonly called "P.F.R.A.", was passed by the Parliament of Canada in 1935 to provide federal assistance in rehabilitating agriculture in the low rainfall areas of the three Prairie Provinces.

The Act, as first passed, provided assistance in water development and cultural work including soil drift control, and in 1937 the scope of the Act was extended to include land utilization and provide for rehabilitation on a community basis by building community pastures on sub-marginal lands and establishing farmers elsewhere. At present all cultural activities are carried on through the Experimental Farms Service, while all of the water development and land utilization activities are directed through the Prairie Farm Rehabilitation Service with headquarters at Regina, Saskatchewan. The field staff employed on these two phases of P.F.R.A. in the three provinces is supervised from the Regina office though in the case of small water developments a part of the engineering staff, in each province, works directly under the provincial water rights office. This arrangement was made in order to facilitate the work in connection with the authorization of projects under provincial statute.

**Administration (Regina)**

Director.....	Dr. L. B. Thomson
Chief Engineer.....	G. L. MacKenzie
Assistant Chief Engineer.....	G. N. Munro
Superintendent Water Development.....	E. L. Gray
Superintendent Community Pastures.....	R. H. L. Youngman

**Administration (Ottawa)**

Associate Director.....G. J. Matte

**PRAIRIE FARM ASSISTANCE ADMINISTRATION**

The Prairie Farm Assistance Act, which provides for benefit payments to farmers of the Prairie Provinces, in townships having low crop yields because of drought, insect damage and other causes, is administered by a Director of Prairie Farm Assistance whose headquarters are at Regina. There is a branch office at Edmonton, from which much of the administrative work for Alberta is carried out and local offices are maintained at Medicine Hat, Lethbridge, Calgary and Winnipeg. A staff of Inspectors is employed in each province, varying in size according to the immediate needs of the Prairie Farm Assistance program. There are eleven full time Supervisors in charge of the field work.

**Administration (Regina)**Director of Prairie Farm Assistance.....R. F. McGregor  
Administrative Assistant.....G. L. Bruce**Alberta (Edmonton)**

Superintendent.....L. H. S. Rowbotham

**Administration (Ottawa)**

Associate Director.....G. J. Matte

**MARITIME MARSHLAND REHABILITATION ADMINISTRATION**

The Maritime Marshland Rehabilitation Act was passed in 1948 and provides for the undertaking of a program of reclamation and development of the marshlands in Nova Scotia, New Brunswick, and Prince Edward Island.

Under the Act the Federal Government will construct and reconstruct the necessary dykes, aboiteaux, and breakwaters, using modern heavy equipment; and the other work, such as drainage and proper land use, will be the responsibility of the provinces and the marsh owners.

Administrative offices have been established at Amherst, N.S., where engineering and construction crews make their headquarters under the supervision of the Director.

**Administration (Amherst)**Director.....J. S. Parker  
Chief Engineer.....J. D. Conlon**Administration (Ottawa)**

Associate Director.....G. J. Matte

**AGRICULTURAL PRICES SUPPORT BOARD**

This Board administers the Agricultural Prices Support Act which provides for assistance in the orderly adjustment of supply-demand relationships in marketing agricultural products. The following are the members of the Board:

A. M. Shaw.....	Chairman
S. J. Chagnon.....	Vice-Chairman
A. H. Turner.....	Member and Secretary- Manager
